IN ADDITION TO THE TASTE QUALITIES OF HONEY, IT ALSO HAS DOZENS OF BENEFITS FOR YOUR HEALTH, WHICH WE CAN'T WAIT TO TELL YOU ABOUT!

WELCOME TO OUR PRESENTATION AND HAVE A NICE JOURNEY INTO THE WORLD OF **HONEY MOOD® RAW ACACIA HONEY!**

What is acacia honey?

Acacia honey is a premium type of honey made by bees that collect nectar from the blossoms of acacia trees, primarily the false acacia (*Robinia pseudoacacia*), also known as **black locust trees**. Renowned for its purity and delicate flavor, acacia honey is a favorite among honey enthusiasts worldwide.

Where does acacia honey come from?

Honey Mood Raw Acacia Honey is made and imported from Republic of Moldova, a less industrialized country, with high fertile soil, favorable climate conditions and relief, agricultural productivity, and rich honey-making heritage.

❖ **Direct Sourcing from Acacia Flowers**

Our honey is sourced directly from the nectar of acacia flowers, ensuring authenticity and quality.

❖ **Uncompromising Quality**

We are committed to providing a bespoke honey service that promises uncompromising quality and flavor.

❖ **Rich in Nutrients and Delicate Flavor**

Its subtle sweetness and floral notes make it a perfect choice for those who enjoy a less intense honey flavor.

❖ **Smooth Texture**

Thanks to its high fructose content, acacia honey stays liquid longer and is less likely to crystallize compared to other honeys.

❖ **Crystallizes very slow**

It remains fluid for up to two years or more. No other types of honey have this characteristic.

Why Honey Mood?

❖ **Our Brand is focused on premium quality**

We pride ourselves on offering only the highest quality honey, meticulously sourced through sustainable and traditional methods, by the most passionate Moldovan beekeepers.
